- meeting slow

- vocabulary
- activating vocabulary
- talking to each other
- Framework languages

- Trying to bring in practice
instead of representation

- with humor (with pain, with support, with joy)

- Slow but steady

Challenges:

= inviting other groups to build a shrine:

- agreeing together on other groups/people/ entities
- a diverse and complementary mix
- inside and outside the own bubble
- (see list)

= location 100 days as an instrument:

- using location 100 days for something useful in the longer run
- (list of possible ideas)
- inhabited space instead of clean out space for only 100days
- overlapping perspectives, diverse uses.

= sharing knowledge

- definitions of shrines
- sharing insights. references, experiences
- hosting the space for 1 or 2 weeks during the documenta 100days

= budget

- insight in and sharing budget
- budget for building shrine
- budget for being a productive space during documenta 15
(we have already bookbinding machine and collab with KMMN Practice and trafohaus)

= location of the shrines

- placement of the shrines is open
- backup from documenta to choose a specific place in the city
- can be a proposal or mock-up to build a shrine and use documenta to talk with the city.

- group of international artists who will assist hosting the 100days space with their own skills, experiences and energy.

>>>>>>

 HOW TO SPEAK GENTLY

- As you understand LUMBUNG is not a theme

- experimenting practically
- It can become into another ^{name} language practice
- Lumbung as in collect or share surplus
to understand interdependency through generosity
to learn to give to take
- long term thinking
- Alle anfang ist schwer
